JOURNAL OF HYDROLOGY

VOLUME 147 NOS. 1–4 CONTENTS 15 JUNE 1993

(Abstracted/indexed in: *Bull. Signal., Curr. Contents, Geo Abstr., Am. Geol. Inst. Bibliogr. Index Geol., and AGRICOLA database*)

Research Papers

Comparison of six rainfall–runoff modelling approaches
F.H.S. Chiew, M.J.Stewardson and T.A. McMahon 1

Runoff mechanisms in a forested groundwater discharge wetland
J.M. Waddington, N.T. Roulet and A.R. Hill 37

Likelihood-based confidence intervals for estimating floods with given return periods
E.S.P.R. Martins and R.T. Clarke..... 61

Estimating the contribution of preferential flow to subsurface runoff from a hillslope using deuterium and chloride
F.W. Leaney, K.R.J. Smettem and D.J. Chittleborough 83

Solution of the inverse problem for the Saint Venant equations
R. Szymkiewicz 105

Seepage into a mountain tunnel and rain infiltration
E. Shimojima, T. Tanaka, R. Yoshioka and Y. Hoso 121

Detection of changes in rainfall and runoff patterns
E.M. Lungu 153

Use of principal-component, correlation, and stepwise multiple-regression analyses to investigate selected physical and hydraulic properties of carbonate-rock aquifers
C.E. Brown 169

Book Reviews

Statistical Methods in Water Resources, by R. Helsel and R.M. Hirsch – C.T. Haan 197

Wildland Watershed Management, 2nd Edn., by D.R. Satterland and P.W. Adams – A.J. Thomasson..... 198
